```java
 1 package tellscopeV4;
 2
 3 /* import libraries */
 4 import java.awt.event.ActionEvent;
 8
 9 public class LoadListener implements ActionListener {
10
11     public void actionPerformed(ActionEvent e) {                //use action performed method
12
13         String s;                                               //create string to store filename
14
15         s = JOptionPane.showInputDialog("Enter a filename");    //prompt user for a filename and store in s
16
17         TellScopeGui04.loadResults(s);                          //call loadResults method to load results set
18
19     }//end action performed
20
21 }//end LoadListener()
22
```
