```java
 1 package tellscopeV4;
 2 /* import libraries */
 3 import java.awt.event.ActionEvent;
 4
 5
 6 public class ClearListener implements ActionListener{
 7
 8    public void actionPerformed(ActionEvent e) {                //use action performed method
 9
10        for(int i=0;i<13;i++)                                   //loop to clear current results set
11        {
12            TellScopeGui04.calcResults[i] = "";                 //set all elements of the results array to null
13        }
14
15        TellScopeGui04.setResults();                            //call setResults method
16
17    }
18
19 }
20
```
